How to Describe Your Blue Prism DX Skill

Aim for clarity, by making sure your description is:

RELEVANT
- Use joint value propositions for your Blue Prism offering
- Respond directly to customer pain
- Minimize jargon; keep your audience in mind

VISUAL
- Illustrate key concepts; save technical details for documentation
- Use video for value pitch and product demos

CONCISE
- Avoid duplicating content
- Make the asset card content direct

⚠️ **Use Packaging Guide for a technical checklist**

A solution that automatically allocates resources to meet the SLAs of the processes, no 3rd party software needed.
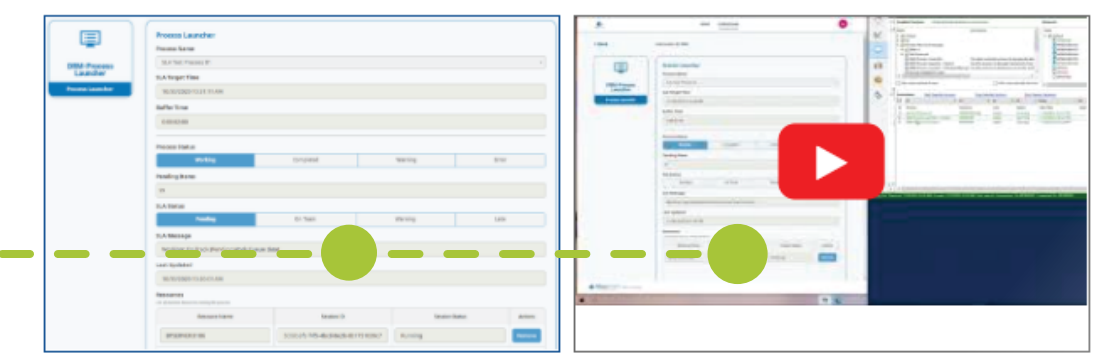

About
Dynamic Resource Manager is a solution built with native Blue Prism features to dynamically allocate resources to meet the SLA (target completion time of the process). By leveraging Interact On-premise, the users can launch and monitor processes via Web Browser on any device without installing the Blue Prism client.
动态资源管理是一个根据流程SLA（目标完成时间）来动态调度资源的解决方案。该方案所有功能均源于Blue Prism原生功能实现，无需第三方工具插件。借由Interact On-premise，用户还可以在任何设备的浏览器网页直接运行和监控流程，无需安装Blue Prism客户端。

Benefits
- Dynamically allocates resources to meet the SLA
- Resilient against network disruptions and process exceptions
- Matches processes with corresponding login credentials
- Supports Resource Pool
- No need to change existing processes
- Can manage multiple processes at the same time
